

**FELTP-PAKISTAN**  
Field Epidemiology & Laboratory Training Program

**Attention: Medical Doctors working in public and private sector**

## **Why should you join FELTP?**

**Why you should join FELTP is:**

*By becoming a "Disease Detective" you will be a part of an elite health force which will respond to any health emergency including outbreaks. You will be able to strengthen disease surveillance systems in Pakistan for timely detection and response to outbreaks. Your effective work will save thousands of lives and ensure healthy Pakistan.*

To induct 15<sup>th</sup> cohort of the prospective Field Epidemiologists; the National Institutes of Health, Ministry of National Health Services, Regulations & Coordination invites applications from public and private sector medical doctors (both males and females), vets for admission in a 2-year specialized "Field Epidemiology & Laboratory Training Program (FELTP)" to be conducted at the National Institutes of Health, Islamabad. Females are encouraged to apply.

The fellows shall be selected for a 2-year training, which includes 2-month contact session in Islamabad (2-week, 2-session/ year) followed by on-the-job mentoring in the respective Disease Surveillance and Response Units (DSRUs) at Provincial/ Regional Director General Health Offices.

All applications shall be submitted within fifteen (15) days from the date of this advertisement. The public sector candidates may apply through their respective Provincial/ Regional Director General Health Offices whereas private sector candidates can apply directly to this Institute. Complete details of eligibility criteria, application procedure is available online at <https://www.nih.org.pk/center-for-disease-control>
